Subject: San Luis Obispo County Flood Control and Water Conservation District's Eligibility and Final Award for 2014 IRWM Drought Grant Funding

Dear Mr. Eusuff:

On behalf of our agency, the San Luis Obispo County Flood Control and Water Conservation District (District) applied for 2014 IRWM Drought Grant funding to secure emergency drinking water supplies for the drought impacted communities of Cambria, San Simeon, Heritage Ranch, and Santa Margarita, along with critical public institutions including the County Emergency Operations Center, the California Men's Colony, Cuesta College, California National Guard at Camp San Luis Obispo, and the County Superintendent of Schools.

As evidenced by the application's third highest score in the State (total score of 34), your Department found that the District's application meets your Department's intent "to target the 2014 IRWM Drought Grant funding to IRWM regions with the greatest drought impacts" and meets the intent of the Governor and Legislature's direction via Senate Bills 103 and 104 to provide expedited funding to provide immediate relief to drought affected communities.

Therefore it was incredibly disappointing to learn this application was disqualified due to CASGEM noncompliance. It is our understanding that District staff is working with DWR in order to have the District's CASGEM plan approved by October 8, 2014. We respectfully request that your staff makes this approval a high priority and restore the District's application to "compliant" with a total score of 34.

Once the score of 34 is restored, we expect the grant reward to be 100% of the \$12,186,321, which is consistent with the two higher scoring applications (i.e. the Upper Sacramento-McCloud and San Francisco Bay Area IRWM regions), as well as all applications scoring a total score of 33. In order to fund the District's application at 100%, we suggest the following:

1. The balance of \$4,937,016 is brought forward into this funding round.
2. The recommended award amounts for Pajaro Valley and Santa Barbara County are adjusted as indicated in Table A below.

Table A. Final Funding Recommendation

Applicant	Score	Grant Request	Recommended Award	% of Grant Request
SLO County Flood Control and Water Conservation District	34	\$12,186,321	\$ 12,186,321	100%
Pajaro Valley Water Management Agency	33	\$12,261,898	\$ 7,561,744	62%
Santa Barbara County Water Agency	32	\$ 4,094,280	\$ -	0%

The Central Coast, particularly San Luis Obispo County, have been ground zero of this current drought. The District's application is funding three interties, a recycled water project, and emergency water supply project in order to ensure the communities at risk have adequate water as this drought persists. Your approval of this application ensure drought funds are allocated to the most high priority areas and projects.

Sincerely,

Kathy A. Kivley
General Manager
